

SULAMAN SHAHZAD

Web Developer

[gmail](#)|[Linkedin](#)|[Github](#)|[Lahore](#)

Summary

CS student at UET (CGPA 3.48) who has shipped full-stack projects using React, Node.js, Express, and MongoDB, PostgreSQL including a 6-service microservices platform built for SOFTEC 2026. Experienced with REST APIs, Fast API, and deployment. Looking to bring practical skills to a web development internship.

Skills

Frontend: HTML, CSS, JavaScript, React | **Backend:** Node, Express, Fast API

Databases: MySQL, MongoDB | **Tools:** Git, REST APIs, Postman, VS code, Vercel, Render

Projects

• **FairGig:** React, Node.js, Express, Fast API, MongoDB

A gig worker platform for earnings logging, screenshot verification, and anomaly detection – built for SOFTEC 2026 hackathon. Workers log earnings across platforms, upload proof, and receive verified income reports. System flags unusual commission hikes or income drops. Advocates use analytics to spot unfair patterns.

Microservices: Auth, Earnings, Anomaly (Fast API/Python), Grievance (Node.js), Analytics, Certificate Renderer

Live: [fairgig](#) | [Github](#)

• **SPYLT:** Animated Can Website | React, Framer Motion, Vercel

Animated can website featuring scroll-triggered animations and interactive product display for a protein milk brand. Showcases multiple flavors with smooth transitions and responsive design.

Certifications

- SQL (Advance): Hacker Rank | [certificate](#)
- React (Basic): Hacker Rank | [certificate](#)

Education

University of Engineering and Technology

B.Sc. Computer Science (2023-2027)

Experience

- **ITech AI Hackathon (UET 2024):** Secured 1st place. Developed an Inventory Management System featuring AI-powered recipe generation
- **SOFTEC Hackathon Participant (FAST 2026):** Developed and presented [fairgig](#), a full-stack platform for gig workers.
